City of Turin (899.806 residents at the 2001 census)

## LIP - ICD-10: C 00

### COMMENTS:

This cancer, with a good prognosis, is clearly decreasing. Incidence is falling in men in relation to the parallel decrease of the main exposure factors: cigarette smoking and outdoor work. Mortality has virtually disappeared in both sex. Survival proportions are very high in men (and fluctuating in women due to the small numbers of cases).
